

Coping with Covid Protection Pack

2020

ANTIMICROBIAL FILM / SURFACE PROTECTION

Our Antimicrobial film is composed of transparent cast polymeric PVC of 60 microns, containing antimicrobial agents, coated with a pressure-sensitive acrylic adhesive. Intended for antimicrobial protection of surfaces in areas that require a high degree of hygiene (public areas, agri-food, wet rooms, hospitals, etc.).

**THE NEW ANTIMICROBIAL
PROTECTS YOUR PREMISES**

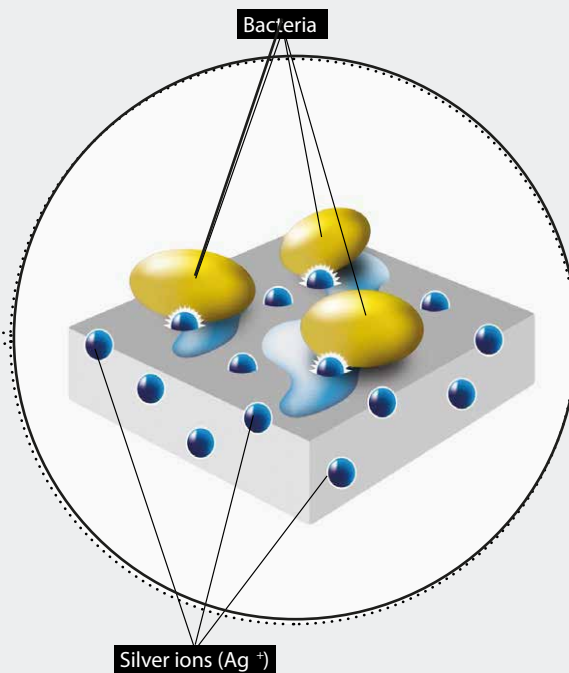

SILVER IONS ANTIBACTERIAL ACTION:

- Protects 24h a day, 7 days a week
- Protects inaccessible areas
- Inhibits the development of 99.99% of the germs tested
- Reduction in percentage of the number of bacteria
- Active for 5 years
- Perfectly ecological
- No nanoparticles

The antimicrobial films can be applied to a wide variety of substrates as long as the target surface is clean, dry, smooth, non-porous and free from any traces of oil, grease, wax, silicone or other contaminants.

During cleaning operations, as well as in the presence of humidity, silver ions are released from the top layer of the film. These ions come into contact with the bacteria, blocking their metabolism and/or interrupting their proliferation mechanism, leading to their destruction.

When the PVC film is manufactured, silver ions encapsulated in a glass matrix are distributed over the film in a uniform manner.

FILM FEATURES:

- Smooth and sleek, so easy to clean
- Perfectly waterproof
- Easy to apply, without disrupting your organisation
- In all areas subject to health constraints: clean rooms, cold stores, etc.
- Resistant to most chemical agents, alcohol, diluted acids, oils.
- Can be applied over graphic all ready in place.

PRICE :

€50.00 per sq m

€85 .00 per sq m fitted

Minimum call out €180.00

Prices are excluding VAT @23%

CLEAR PLASTIC PET SURFACE WITH ANTIMICROBIAL FILM

A strong light and transparent durable plastic pet film that has our antimicrobial film applied to its surface creating a permanent protective barrier with no fitting required. Simply place on the surface and available in various sizes. The laminate film surface creates a 24-7 antimicrobial protection that attacks harmful viruses and germs.

SCREEN FEATURES:

- Material clear acrylic
- Easy to wipe clean and sanitise
- No fitting required
- Custom design to suit area
- No drilling required for fixing method
- Full colour print can be applied such as logo

Please contact us directly regards pricing

PROTECTIVE SCREENS / OFFICES

We offer a range of transparent screens made of clear safety laminated glass, Perspex, acrylic sheets. These screens act as protective shielding between employees and customers. Clear screens help to reassure both staff and customers in the current Covid19 environment. Both polycarbonate and acrylic screens offer the same clarity as glass but are only half the weight at the same thickness. Safety Glass is a longer term solution and will not dull or scratch as easily over time from cleaning and wear and tear.

SCREEN FEATURES:

- Material options safety glass, acrylic, Perspex
- Easy to wipe clean and sanitise
- Cut to size
- Custom design to suit area
- Easy to apply, without disrupting your organisation
- No drilling required for fixing method
- Full colour print can be applied such as logo

MICRO AIR MASK - CE CERTIFIED

MADE IN ITALY

Antimicrobial protection
High breathability and maximum comfort.
Non irritating polyester
Reusable for up to 100 washes.

Microair Mask is 100% polyester microfilm with very thick texture, protected with a permanent antimicrobial to washing and never released. Microair Mask is indicated for every day use or other situations where it is required to minimize the transmission of bacteria, viruses and particles from the facial area to the surrounding environment, The permanent anti-microbial treatment blocks microorganisms that come into contact with the mask.

The fabric is guaranteed by Oeko-Tex Standard 100 which certifies the absence of harmful substances and the suitability with direct contact with the skin.

This is further confirmed by the MicroAir Mask achieving the highest rating of zero for cytotoxicity when tested to ISO 10993-5:2009.

The construction of the mask with the active antimicrobial facilitates it achieving 98.2 BFE (bacterial filtration efficiency) when tested to BS EN 14683:2019 combined with a commendable result of 3.21 UFC (bioburden bacterial proliferation capacity).

Due to its unique construction this is achieved whilst having an average porosity of 5.9 micron which provides you with a mask that allows you to breath more easily than other masks with similar results.

MICRO AIR MASK C€ CERTIFIED

DESIGNED FOR:

- Block droplets that can carry microorganisms (e.g. viruses, bacteria);
- Break down microorganisms and contact thanks to perennial anti-microbial treatment;
- Ensure optimal comfort, dry feeling and little resistance to breathing, thanks to the high breathability;
- Avoid irritation, allowing continuous use for many hours;
- Be washable and reusable up to 100 times;
- Minimize the ways of breathing and venting;
- Minimize fogging if you use glasses.

PRICE:

€8.25 each

All prices are + VAT @23%

HOW TO USE

1. Clean your hands carefully;
2. Position the elastics well around the ears and arrange the device by pulling it from top to bottom until it covers the nose, mouth and chin (the soft elastics allow you to adjust the length even with small knots);
3. Avoid touching the device during use;
4. Clean your hands after removing the device.

HOW TO WASH

We recommend washing by hand, using a normal detergent and avoiding fabric softener (it reduces antimicrobial efficacy).

Washing in the washing machine can be done up to a temperature of 90 ° C but spin dryer and dryer must be avoided (the fabric dries quickly however). If necessary, it is possible to sanitize Microair Mask using chlorine-based additives (e.g. bleach): immerse the device in a bowl with water and bleach (in the doses indicated by the manufacturer) for at least 10 minutes and then proceed to handwash with detergent ; make abundant and repeated rinses. Sanitization with 70% hydroalcoholic solution is also possible (colorless alcohol is recommended to prevent the device from taking on color). The fabric maintains its barrier action and antimicrobial efficacy for 100 washes.

SNOOD SCARF

Absolute comfort and a natural protection.

A silky, smooth and refreshing scarf/ mask made from natural bamboo material. Anti-Bacterial: Bamboo's natural resistance to diseases means it can be worn for up to three days without washing.

Which is why this natural wonder fabric is being used in hospitals world wide for post Chemo therapy, new born babies and people with common skin disorders such as Acne, Cystitis, Excema and Dermatitis Bamboo fabrics wick away moisture and keep you sweat free.

All natural fibers have a built in temperature regulator and Bamboo has an even cooler natural temperature than silk & cotton. This means they are reactive, keeping you cool in warmer temperatures and warmer in cooler temperatures. Bamboo includes 5% elastane for stretch and comfort.

Branding of labels with logos is 0.50 cents per label and all branding proceeds go to Aware.

INFRARED THERMOMETER

Non-Contact Infrared Thermometer are a simple and quick way to accurately take someones temperature. This product can measure the body temperature by collecting the infrared thermal radiation from the human forehead. Simply point the thermometer and it will read from 1-3 cm distance.

With its easy to read large backlit display it is not only really convenient but quick and easy to use.

PRODUCT FEATURES:

- Adopt high precision infrared sensor
- Strong environmental temperature adaptability
- Automatically save the last measurement
- Large size LCD screen, high brightness backlight
- Two temperature units are available: Celsius and Fahrenheit
- Automatic shutdown energy saving
- Clean and hygienic: non-contact forehead temperature measurement
- One key to measure, one key to check memory
- Multi-group memory: 50 sets of measurement data can be stored

PRICE:

€80.00 each

RECOGNITION DEVICE FACIAL AND TEMPERATURE

Complete device for epidemic prevention that allows: recognition of faces, detection of body temperature, detection of using mask, control of the presences and access all in one device. Simple and elegant, it is suitable for installation in any type of environment and allows you to have an alarm in case of too high temperature detection or unauthorised face.

It can be easily installed in shops, companies, offices, stations, fairs, hotels, residences and any other environment.

ADVANTAGES OF USING THE DEVICE:

- Compared to short range temperature reading guns the device is much more comfortable and reliable, also not requiring the presence of a nearby operator.
- Automatically records any temperature anomalies and related person.
- Supports network connection.
- Simple and versatile installation.

MADE IN ITALY

RECOGNITION DEVICE FACIAL AND TEMPERATURE

TECHNICAL FEATURES:

Camera resolution: 2 Mega Pixels

Image sensor: 1 / 2.8 "SONY IMX327

Optimal reading distance: 25-60cm

Error margin: $\pm 0.3^{\circ}\text{C}$

Reading time: $\leq 1\text{sec}$

Detection range: $34-42^{\circ}\text{C}$

Recognition data: Portrait, mask

Detection: Biometric

Face recognition accuracy: 99.5%

Recognition distance: 0.3-1.5m

Recognition time: $\leq 1\text{sec}$

Faces database: 15000 faces

Types of alarm: Alarm on display, voice alarm, alarm on mobile app

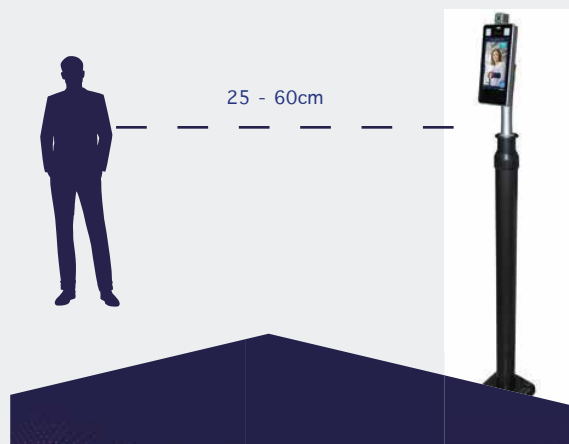

USB: Supported

Power supply: 12VCC, 12W

Working temperature: $-20 - + 60^{\circ}\text{C}$

Screen size: 269x120x30mm

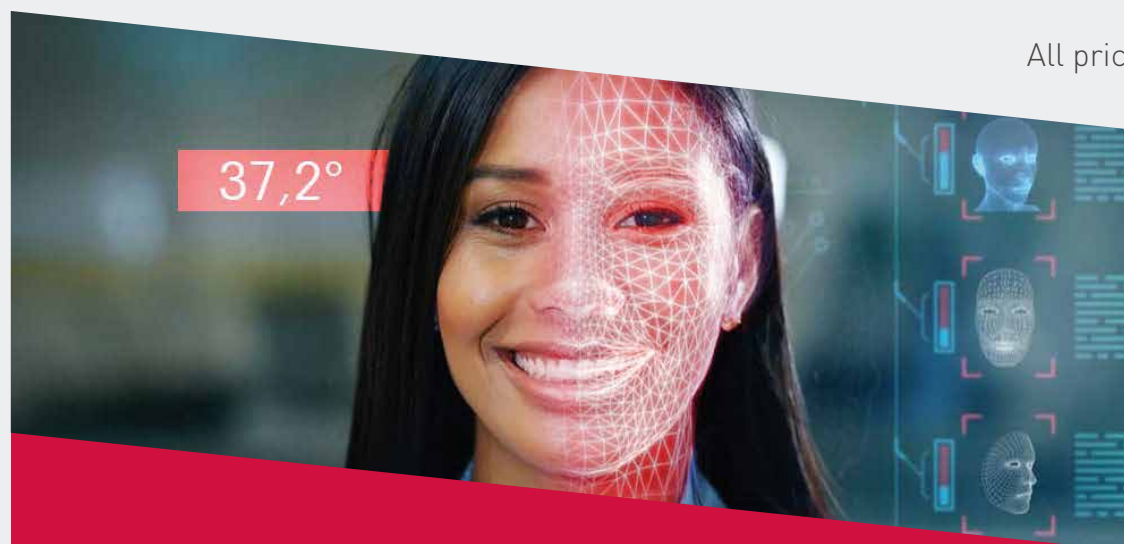

Available accessories: floor base h 110cm, table base

PRICE:

€1230.00 each

MADE IN ITALY

UV STERILIZER & DISINFECTANT BOX

This box is a safe device with UV-C system for the **sterilization of masks** and all your small personal items (e.g. telephones, keys, credit cards, tablets, smart watches, earphones and practically any other small object suitable for the room).

This acrylic box uses two TUV PL-S lamps which are UV-C lamps, controlled and managed by a timer to allow the lamps to sterilize, which are also used in residential water and water disinfection units. TUV PL-S lamps offer constant short-wave UV-C emission, at 254 nm, for their entire duration, for maximum disinfection safety and high system efficiency.

NMV FACE MASK

Designing a face mask presents a difficult challenge in finding the balance between comfort, protection and style. For those who feel that a full face visor is a step too far, or indeed, the cloth mask is too impersonal, we have an alternative.

Our NMV Mask is a minimalist design that is comfortable and easy to wear. Reusable and easy to clean, this mask has got you covered.

The nose bands come in a range of colours and discreet branding is optional. Please contact us directly for pricing and availability.
